CONTENTS TO VOLUME 62

PART 1 8 JANUARY 1974

On the torque of wavy vortices. P. M. EAGLES *page* 1

Turbulent vortex streets and the entrainment mechanism of the turbulent wake. DEMOSTHENES D. PAPAILIOU and PAUL S. LYKOUDIS 11

Flows with concentrated vorticity: a report on EUROMECH 41. N. RILEY 33

Physical characteristics of subsonic jets in a cross-stream. P. CHASSAING, J. GEORGE, A. CLARIA and F. SANANES 41

Turbulent shear flow in a curved duct. L. B. ELLIS and P. N. JOUBERT 65

Response of Pitot probes in turbulent streams. H. A. BECKER and A. P. G. BROWN 85

Measurements of the nearly isotropic turbulence behind a uniform jet grid. MOHAMED GAD-EL-HAK and STANLEY CORRSIN 115

A resolution of the blow-off singularity for similarity flow on a flat plate. D. R. KASSOY 145

Distorted gas bubbles at large Reynolds number. M. EL SAWI 163

The transverse force on a drop in an unbounded parabolic flow. PHILIP R. WOHL and S. I. RUBINOW 185

PART 2 23 JANUARY 1974

Vortex shedding from spheres. ELMAR ACHENBACH 209

Combined dye-streak and hydrogen-bubble visual observations of a turbulent boundary layer. G. R. OFFEN and S. J. KLINE 223

The locomotion of elongated bodies in pipes. A. M. LAVIE 241

A measurement of Lagrangian velocity autocorrelation in approximately isotropic turbulence. D. J. SHLIEN and S. CORRSIN 255

Two-dimensional turbulence near the viscous limit. J. S. A. GREEN 273

Plate-injection into a separated supersonic boundary layer. Part 2. The transition regions. K. STEWARTSON 289

On Kolmogorov's inertial-range theories. ROBERT H. KRAICHNAN 305

Intermittent turbulence in self-similar cascades: divergence of high moments and dimension of the carrier. BENOIT B. MANDELBROT 331

A separated flow in mixed convection. GRAHAM WILKS 359

Ageostrophic effects in rotating stratified flow. Herbert E. Huppert and Melvin E. Stern *page* 369

Global stability of time-dependent flows. Part 2. Modulated fluid layers. George M. Homsy 387

Application of an inner expansion method to plane, inviscid, compressible flow stability studies. Roy J. Beckemeyer 405

Part 3 11 February 1974

The effect of side walls on homogeneous rotating flow over two-dimensional obstacles. Herbert E. Huppert and Melvin E. Stern 417

Developing large-scale wavelike eddies and the near jet noise field. J. T. C. Liu 437

Convection in the earth's mantle: towards a numerical simulation. D. P. McKenzie, J. M. Roberts and N. O. Weiss 465

Prediction of laminar flow and heat transfer in helically coiled pipes. S. V. Patankar, V. S. Pratap and D. B. Spalding 539

Computer extension and analytic continuation of Stokes' expansion for gravity waves. Leonard W. Schwartz 553

Convection induced by centrifugal buoyancy. F. H. Busse and C. R. Carrigan 579

The rheological properties of suspensions of fibres in Newtonian fluids subjected to extensional deformations. J. Mewis and A. B. Metzner 593

Heat and mass transfer between a rough wall and turbulent fluid flow at high Reynolds and Péclet numbers. A. M. Yaglom and B. A. Kader 601

Part 4 27 February 1974

Phase and amplitude discrepancies in the surface wave due to a wedge-ended hull form. R. G. Standing 625

Generalized Eady waves. Gareth P. Williams 643

On the Poincaré problem for a compressible medium. Roger F. Gans 657

Stress work effects in laminar flat-plate natural convection. J. A. D. Ackroyd 677

Fluid motions induced by a periodic magnetic field in and about a liquid drop. C. Sozou 697

Effect of ohmic dissipation on internal Alfvén–gravity waves in a conducting shear flow. N. Rudraiah and M. Ventkatachalappa 705

Gasdynamics of a centrifugal machine. TAKEO SAKURAI and TAKUYA MATSUDA *page* 727

Motion driven by surface-tension gradients in a tube lining. STEPHEN H. DAVIS, AN-KUO LIU and GEORGE R. SEALY 737

Linear stability theory of oscillatory Stokes layers. CHRISTIAN VON KERCZEK and STEPHEN H. DAVIS 753

Edge waves: a long-wave theory for oceans of finite depth. R. GRIMSHAW 775

Second-order effects in free convection. I. C. WALTON 793

On the flow field of a rapidly oscillating airfoil in a supersonic flow. M. KUROSAKA 811

CORRIGENDA 828

ASSISTANT EDITORS

PROF. S. H. DAVIS (*Johns Hopkins*)
DR H. E. HUPPERT (*Cambridge*), DR M. E. MCINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts; semi-monthly, except in March, May, September and December, when monthly. Single parts cost £4.00 net (US $12.00 in the U.S.A. and Canada) plus postage. The 1974 subscription price of a volume (which includes postage) is £11.50 net (US $36.00 in the U.S.A. and Canada). Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 63

PART 1 18 MARCH 1974

An 'entraining plume' model of a spilling breaker. M. S. LONGUET-HIGGINS and J. S. TURNER *page* 1

Gaussian fields and random flow. ALEXANDRE JOEL CHORIN 21

A ν-fluid model of homogeneous turbulence subjected to uniform mean distortion. J. M. DOWDEN 33

Ice stalactites: comparison of a laminar flow theory with experiment. SEELYE MARTIN 51

An analytic characteristic method for steady three-dimensional isentropic flow. ANNELIESE FROHN 81

Nonlinear gas oscillations in pipes. Part 2. Experiment. B. STURTEVANT 97

Mean and fluctuating flow measurements in the hypersonic boundary layer over a cooled wall. A. J. LADERMAN and A. DEMETRIADES 121

Turbulent hypersonic viscous interaction. J. L. STOLLERY and L. BATES 145

A mathematical model of mass transport in a long permeable tube with radial convection. STEPHEN M. ROSS 157

Short surface waves in a canal: dependence of frequency on curvature. F. URSELL 177

Stability of developing pipe flow subjected to non-axisymmetric disturbances. L. M. HUANG and T. S. CHEN 183

An experimental study of the near wake of a slender cone at varying incidence at $M_\infty = 7$. JACQUES MARCILLAT 195

PART 2 3 APRIL 1974

Some properties of truncated turbulence signals in bounded shear flows. ROBERT S. BRODKEY, JAMES M. WALLACE and HELMUT ECKELMANN 209

A numerical study of the roll-up of a finite vortex sheet. D. W. MOORE 225

Vortex pairing: the mechanism of turbulent mixing-layer growth at moderate Reynolds number. C. D. WINANT and F. K. BROWAND 237

Shear fronts and an experimental stratified shear flow. A. D. MCEWAN and P. G. BAINES 257

Unsteady current-induced perturbation of a magnetically contained magnetohydrodynamic flow. LIM CHEE-SENG 273

The spectral evolution of sedimentary bed forms. SUBHASH C. JAIN and JOHN F. KENNEDY 301

An investigation of the topography and motion of the turbulent interface. S. T. Paizis and W. H. Schwarz *page* 315

Measurements in the thick axisymmetric turbulent boundary layer near the tail of a body of revolution. V. C. Patel, A. Nakayama and R. Damian 345

Experiments on the behaviour of an axisymmetric turbulent boundary layer with a sudden circumferential strain. L. R. Bissonnette and G. L. Mellor 369

Review

Turbulent Diffusion in the Environment, by G. T. Csanady 414

Part 3 29 April 1974

Finite amplitude side-band stability of a viscous film. S. P. Lin 417

The hypersonic laminar boundary layer near sharp compression and expansion corners. A. W. Bloy and M. P. Georgeff 431

The effect of mean compression or dilatation on the turbulence structure of supersonic boundary layers. P. Bradshaw 449

Upstream propagation of unsteady disturbances in supersonic boundary layers. Wilhelm Schneider 465

The stability of pendent liquid drops. Part 2. Axial symmetry. E. Pitts 487

Near-resonant forcing in a shallow two-layer fluid: a model for the internal surge in Loch Ness? S. A. Thorpe 509

On the nonlinear evolution of three-dimensional disturbances in plane Poiseuille flow. A. Davey, L. M. Hocking and K. Stewartson 529

Conical flow near singular rays. G. I. Zahalak and M. K. Myers 537

Onset of cellular convection in a salinity gradient due to a lateral temperature gradient. C. F. Chen 563

Two-dimensional effects in double-diffusive convection. J. S. Turner and C. F. Chen 577

On the stability of a magnetically driven rotating fluid flow. A. T. Richardson 593

Hydromechanics of low-Reynolds-number flow. Part 1. Rotation of axisymmetric prolate bodies. Allen T. Chwang and T. Yao-Tsu Wu 607

Review

Perturbation Methods, by A. H. Nayfeh 623

PART 4 15 MAY 1974

The radiation and scattering of surface waves by vertical barriers. D. PORTER *page* 625

The structure of jets of water and polymer solution in air. J. W. HOYT, J. J. TAYLOR and C. D. RUNGE 635

Numerical and asymptotic solutions for the supersonic flow near the trailing edge of a flat plate at incidence. P. G. DANIELS 641

The meniscus on the outside of a small circular cylinder. DAVID F. JAMES 657

On magnetohydrodynamic flows generated by an electric current discharge. C. SOZOU 665

Perturbed turbulent flow, eddy viscosity and the generation of turbulent stresses. RUSS E. DAVIS 673

Finite-amplitude thermal convection in a spherical shell. RICHARD E. YOUNG 695

The inviscid nonlinear instability of parallel shear flows. J. L. ROBINSON 723

The stability of a trailing line vortex. Part 1. Inviscid theory. MARTIN LESSEN, PAWAN JIT SINGH and FREDERICK PAILLET 753

Finite-amplitude neutral disturbances in plane Poiseuille flow. W. D. GEORGE, J. D. HELLUMS and B. MARTIN 765

On the interaction of internal waves and surface gravity waves. JOHN E. LEWIS, BRUCE M. LAKE and DENNY R. S. KO 773

Nonlinear interactions among standing surface and internal gravity waves. TERRENCE M. JOYCE 801

Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts; semi-monthly, except in March, May, September and December, when monthly. Single parts cost £4.00 net (US $12.00 in the U.S.A. and Canada) plus postage. The 1974 subscription price of a volume (which includes postage) is £11.50 net (US $36.00 in the U.S.A. and Canada). Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 64

PART 1 3 JUNE 1974

On the development of dunes in erodible channels. JØRGEN FREDSØE *page* 1

On the rapid rotation of a massive sphere in a monatomic gas. M. R. FOSTER 17

On the propulsion of micro-organisms near solid bounaries. DAVID F. KATZ 33

Large amplitude convection in porous media. JOE M. STRAUS 51

The stability of a thermally radiating stratified shear layer, including self-absorption. JOSEPH J. DUDIS 65

An analysis of flow through sudden enlargements in pipes. R. G. TEYSSANDIER and M. P. WILSON 85

On optimum design in fluid mechanics. O. PIRONNEAU 97

Low Reynolds number flow over a plane symmetric sudden expansion. F. DURST, A. MELLING and J. H. WHITELAW 111

A numerical study of turbulence transitions in convective flow. BART J. DALY 129

An experimental study of the flow of thin liquid sheets in hot atmospheres. C. J. CLARK and N. DOMBROWSKI 167

The formation of atmospheric fronts downstream in a deformation field. BRIAN J. HOSKINS 177

Turbulent shear flow mixing and rapid chemical reactions: an analogy. CHUNG-HUA LIN and EDWARD E. O'BRIEN 195

REVIEW

Statistical Models and Turbulence, edited by M. Rosenblatt and C. Van Atta 207

PART 2 19 JUNE 1974

Unsteady viscous flow in a pipe of slowly varying cross-section. P. HALL 209

Turbulent vortex rings. T. MAXWORTHY 227

Kelvin wave propagation along an irregular coastline. L. A. MYSAK and C. L. TANG 241

Turbulent flow in smooth concentric annuli with small radius ratios. K. REHME 263

Evolution of unstable shear layers in a rotating fluid. W. L. SIEGMANN 289

Instability of rigidly rotating flows to non-axisymmetric disturbances. S. A. MASLOWE 307

Nonlinear cellular motions in Poiseuille channel flow. J.-P. Zahn, Juri Toomre, E. A. Spiegel and D. O. Gough *page* 319

Experimental studies on the onset of thermohaline convection. Douglas R. Caldwell 347

Influence of viscous dissipation on Bénard convection. D. L. Turcotte, A. T. Hsui, K. E. Torrance and G. Schubert 369

Hydromechanics of lunate-tail swimming propulsion. M. G. Chopra 375

Radiation properties of the semi-infinite vortex sheet: the initial-value problem. D. G. Crighton and F. G. Leppington 393

Review

Turbulence in the Free Atmosphere, by N. K. Vinnichenko, N. Z. Pinus, S. M. Shmeter and G. N. Shur 415

Part 3 8 July 1974

Experimental investigation of rarefied gas flow in different channels. B. T. Porodnov, P. E. Suetin, S. F. Borisov and V. D. Akinshin 417

Natural convection of viscoelastic fluids in a vertical slot. Doğan Gözüm and V. S. Arpaci 439

Drag due to the motion of a Newtonian fluid through a sparse random array of small fixed rigid objects. I. D. Howells 449

Investigation of turbulent convection under a rotational constraint. Shu-Kwan Chan 477

The evolution of under-ice melt ponds, or double diffusion at the freezing point. Seelye Martin and Peter Kauffman 507

Wakes behind two-dimensional surface obstacles in turbulent boundary layers. J. Counihan, J. C. R. Hunt and P. S. Jackson 529

Convective temperaure oscillations in molten gallium. D. T. J. Hurle, E. Jakeman and C. P. Johnson 565

A theory of thermal oscillations in liquid metals. A. E. Gill 577

An experimental investigation of high Reynolds number steady streaming generated by oscillating cylinders. Arnold F. Bertelsen 589

Phase-angle measurements between hot-wire signals in the turbulent wake of a two-dimensional bluff body. J. E. L. Simmons 599

The jet density exponent issue for the noise of heated subsonic jets. R. Mani 611

Review

Workshop on Micrometeorology, edited by Duane A. Haugen 623

PART 4 24 JULY 1974

Turbulent/non-turbulent decisions in an intermittent flow. THOMAS B. HEDLEY and JAMES F. KEFFER *page* 625

Some turbulent/non-turbulent properties of the outer intermittent region of a boundary layer. THOMAS B. HEDLEY and JAMES F. KEFFER 645

Use of a pseudo-turbulent signal to calibrate an intermittency measuring circuit. R. A. ANTONIA and J. D. ATKINSON 679

Diffusion-flame structure for a two-step chain reaction. WILLIAM B. BUSH and FRANCIS E. FENDELL 701

Non-equilibrium dissociating nitrogen flow over a wedge. D. J. KEWLEY and H. G. HORNUNG 725

Convection of a passive scaler by a quasi-uniform random straining field. ROBERT H. KRAICHNAN 737

Evolution of a moderately short turbulent bounary layer in a severe pressure gradient. R. G. DEISSLER 763

On density effects and large structure in turbulent mixing layers. GARRY L. BROWN and ANATOL ROSHKO 775

Stokes flow about a sphere attached to a slender body. N. J. DE MESTRE and D. F. KATZ 817

REVIEW

Experimental Methods of Hypersonics, by J. Lukasiewicz 827

SHORTER NOTICES

Recent Developments in Shock Tube Research, edited by D. Bershader and W. Griffith 828

Low Reynolds Number Hydrodynamics, by J. Happel and H. Brenner 828

Annual Review of Fluid Mechanics, volume 6, edited by M. Van Dyke, W. G. Vincenti and J. V. Wehausen 828
